

VAL-001B — Renewal Bucket Filtering

Status

Open

Priority

High

Objective

Ensure the Renewals Center displays only contracts relevant to renewal management.

Current Behavior

Renewal buckets currently display:

- Active
- Renewing
- Archived
- Terminated
- Null Disposition

Example:

60 Days bucket currently contains:

- GKD-GD-2026-001 (Archived)
 - GKA-AN-2026-001 (Terminated)
-

Issue

Archived and Terminated contracts are no longer renewal candidates.

Displaying them inside renewal buckets creates noise and inflates operational workload visibility.

Approved Rule

Renewal buckets should only display:

- Active
- Renewing

- Null Disposition

Exclude:

- Archived
 - Terminated
-

Expected Result

60 Days bucket becomes empty.

Renewal buckets show only contracts that still require lifecycle management.

Status

Pending Implementation
